CAPITAL STOCK, \$150,000

Our First Well

Will Be Drilled Soon

This well would have been going down now but for

a brief delay in getting material to the ground. We have a string of tools ready, the rig is completed,

casing is ready for delivery to the field and in a few

more days our drill will start down toward the OIL.

We are going after PRODUCTION and DIVI-

DENDS-going after it in a BIG WAY-and

everything points, unmistakably, to EARLY SUC-

All Around Our First Drilling Site Have Made It

in Our Minds, an Absolutely "Sure Shot" for Production

reach the big pay sand before DIVIDENDS will START.

The Foote well, just 900 feet North of our 10 acre location, is making oil at a 2200 feet level and is making pure gasoline from below at 2800 feet. The Harrington well, one mile Southeast, is making fully 600 barrels of oil and is increasing its flow.

The Davis well, which has been producing for some time, increased its flow dur-

ing the past week. Our first well is going down on the 10 acre tract, surrounded by such wells as these. Look at the map, study it closely—think what these developments mean to Texas Duke stockholders. We feel that BIG DIVIDENDS are POSITIVELY ASSURED. We don't see how we can possibly miss getting oil on this tract. We feel sure that it is only a matter of the time it requires our drill to

Three Wonderful Tracts

in the Heart of Great Duke Field

Every acre of our matchless leases are absolutely proven for oil—they are surrounded by production and by the

greatest drilling activities in the Texas fields. It may never be your opportunity again to buy stock in a company with such certain and brilliant assurance of tremendous returns. The dividend possibilities of Texas Duke are almost unlimited. Just imagine what Texas Duke stock will be worth when all our large PROVEN leases are

If you want a share of the wealth that is being produced in the world's greatest oil fields-millions of dollars
